

SITE ENHANCEMENT FOR AVIATION ASSETS

*Rapid Installation.
All-weather Durability.
Environmentally Safe.*

DURA-BASE® Advanced-Composite Mat System give aviation assets a solid platform from which to launch operations in extreme environments. The mats dramatically reduce foreign object debris (FOD). This attribute protects both aviators and ground personnel alike, while helping to extend the lifespan of helicopter rotor blades and engines.

DURA-BASE® mats are mission-ready for remote base operations, airfield support, FARP sites, portable maintenance work surfaces, temporary motor pool surfaces, walkways, tent platforms and medical support operations.

Expert site evaluation and technical support is available.
